Professional Summary

Data Analyst, AI/ML Developer, and Full-Stack Developer skilled in Python, SQL, Power BI, machine learning, computer vision, and modern web development. Experienced in building production-oriented AI-powered SaaS platforms, analytics applications, automation systems, dashboards, and full-stack web solutions. Strong hands-on experience in data processing, EDA, predictive modeling, REST APIs, database management, cloud services, and end-to-end application development.

Technical Skills

Programming: Python, SQL, JavaScript
Frontend: HTML, CSS
Backend: Flask
Data Analytics: Power BI, Excel, pandas, NumPy, Matplotlib, Seaborn, EDA, Statistical Analysis
AI/ML: NLP, YOLO, Face Recognition, scikit-learn
Automation: Selenium, Browser Automation
Cloud/Storage: Cloudinary
Databases: SQLite, SQL
DevOps/Tools: Git, GitHub, Razorpay

Education

B.Tech – Artificial Intelligence and Data Science
M.A.M College of Engineering, Tiruchirappalli
Sep 2023 – May 2027

HSLC (Higher Secondary)
Boiler Plant Boys Higher Secondary School
Score: 75.8%

SSLC (Secondary School)
Boiler Plant Boys Higher Secondary School
Score: 80%

Internships

Data Analyst Intern – Nizcare Private Limited, Trichy *Dec 2025 – Present*

- Worked with Excel and data analytics tools for real-world data processing and reporting.
- Built responsive website pages and professional email templates using HTML.
- Supported data management, analysis, and business operations workflows.

Data Analyst Intern – Elevate Labs *Sep 2025 – Nov 2025*

- Awarded **Best Performer** for internship performance.
- Performed data cleaning, preprocessing, and exploratory data analysis.
- Built analytical dashboards and reports using Python and Power BI.

Data Science Intern – EdVedha *Mar 2025 – May 2025*

- Built an E-Commerce Product Recommendation System.
- Applied collaborative filtering, content-based recommendation, and scikit-learn.

AI & ML Intern – TechShiksha, Bangalore *Jul 2025*

- Worked with NLP, Computer Vision, and Microsoft Azure Cloud.
- Developed machine learning workflows for document intelligence applications.

</> Projects

SmartPix – AI Event Photo Matching System Live Demo

- Developed a full-stack AI event photo matching platform that matches guest selfies with event photographs.
- Implemented face recognition encodings, Cloudinary storage, QR-based guest access, selfie capture, and real-time matching.
- **Tech:** Python, Flask, HTML, CSS, JavaScript, Cloudinary, Face Recognition

StructAI – AI Structural Health Monitoring

- Built an AI-based structural inspection system using YOLO to detect and classify structural cracks.
- Implemented crack severity assessment, progression tracking, role-based access, and automated PDF inspection report generation.
- **Tech:** Python, YOLO, Computer Vision, Machine Learning, PDF Reporting

HotelPulse AI – Hotel Analytics SaaS

- Developed an upload-first analytics platform for hotel finance teams supporting CSV-based invoice, customer, and hotel data ingestion.
- Implemented live KPIs including DSO, collection efficiency, overdue analysis, forecasting, and downloadable HTML reports.
- **Tech:** Python, Data Analytics, pandas, SQL, Full-Stack Development

PrintFlow AI – SaaS Print Shop Platform

- Built a production-oriented print ordering SaaS with server-side pricing, page counting, payment verification, and order management.
- Implemented Celery/Redis job processing, S3-compatible storage, Razorpay payments, WebSocket tracking, and CUPS/IPP printer monitoring.
- **Tech:** FastAPI, Celery, Redis, WebSockets, S3, Razorpay, CUPS/IPP

Attendance Automation System Live Demo

- Developed a Flask + Selenium automation system that extracts absentee register numbers from PDF, Excel, CSV, and TXT files.
- Automated attendance marking on the college portal using regex and pandas with a live automation console and browser screenshots.
- **Tech:** Python, Flask, Selenium, pandas, Regex, Browser Automation

Smart Face Recognition Attendance System

- Built an automated attendance system using OpenCV and face recognition for real-time student identification.
- Implemented real-time detection and database-based attendance logging.

Smart Restaurant Management System Live Demo

- Developed a QR-based digital ordering platform with real-time order management and kitchen notifications.
- Automated billing, GST calculation, table management, and order status tracking.

PlantTalk AI – Multilingual Image-to-Talking Video Generator

- Developed an AI system that transforms plant images into talking videos using custom scripts and multilingual speech.
- Integrated image animation, facial mapping, text-to-speech, and AI video generation for Tamil and English storytelling.

Certifications

Microsoft – Describe Cloud Computing
Microsoft – Natural Language Processing
Microsoft + LinkedIn – Career Essentials in Generative AI
Infosys Springboard – Python Basics
Excel Dashboard – NoviTech
AI Face Recognition – LiveWire
Menmozhi AI – Generative AI Participation

Achievements

- Best Performer Award – Elevate Labs (2025)
- Microsoft Bangalore Industrial Visit – TechShiksha

Languages

English (Fluent), Tamil (Fluent), Urdu (Intermediate), Malayalam (Intermediate)
